

# Kunal Shukla

JUNIOR SOFTWARE ENGINEER

## Profile

Successfully completed a full time, 16 week software development bootcamp run by The School of Code. Problem Solving and Pair Programming formed key aspects of the course. Seeking full-time, London-based/Remote roles in Full-stack Development.

## Experience

### Full-Stack Developer Training, School of Code, Remote

APRIL 2022 – AUGUST 2022

- During the final 4-week project, I worked in an Agile team of 6 to create a full stack application called 'CHEWS' [[Repo Link](#)], to solve the problem of decision-fatigue around meal planning at home.
- We pair and mob-programmed across our whole project and everyone worked on all aspects of the app. We managed the team via daily stand ups and retrospectives,
- Once we achieved our MVP we were able complete another iteration with our 'Should-Have' features.
- Virtually showcased/presented our application to industry professionals.

### Barista, Pophams Bakery, London

JUNE 2021 – MARCH 2022

- Learnt to work as part of a small team in a highly time-pressured work environment
- Efficiency of service and attention to detail were crucial aspects of the role.

### Store Support Team Member, Whole Foods Market, London

APRIL 2017 – MARCH 2020

- This role taught me to be level headed in fast-paced, high- pressure situations. I honed my inter-personal skills by addressing customer queries in an efficient manner, often going above and beyond what was expected of me.

### Online Marketing Executive, Euro Car Parts, London

JANUARY 2012 – NOVEMBER 2014

- Exposure to a range of online marketing tools such as Google analytics, Email marketing & Social management platforms such as Mailchimp/Hootsuite.

## Education

### Specialty Coffee Course, Well Grounded, London

MAY 2021 – JUNE 2021

### BSc (Hons) Information Systems with eCommerce, Kingston University, London

SEPTEMBER 2009 – AUGUST 2010
